PEÑASOL

Protector Glaze and Decorator Multipurpose

Page 1 of 2

Product manufactured with special acrylic resins for particle very fine for the protection of wood against the Sun and moisture. The glaze, unlike varnish, penetrates deeply into the wood, open pore. By not forming layer allows the wood to breathe and will always keep the balance between the moisture of the wood and the environment that surrounds it. In this way protects and beautifies wood with **maximum respect to the natural appearance of your veins.**

It is colorless or transparent, flexible and hard, presents great adherence, easy to apply and very low odor. This formulation contains specific fungicides that protect the wood from the blueness and other diseases caused by fungi.

It can also be used as a fixative and waterproofing for general use of plaster, cement, plaster, lime, brick, stone, etc. without that material where they apply just suffer alterations in color. It protects the saltpeter from moisture and other impurities. It can be dyed with Pinturas de la Peña's universal dye.
